

Training Content Outline

Module 1: Introductions and Overview

Module 2: Data Governance Primer

Unstructured data and the importance of data governance

Module 3: Overview of Directory Services and Permissions

How Active Directory, LDAP and permissions relate to each other

Module 4: DatAdvantage Architecture

Highly scalable architecture: GUI, IDU Analytics, databases, probes, file filters

Module 5: Server preparation for DatAdvantage Installation

Hardware, software, MS infrastructure, and password requirements

Module 6: Varonis IDU Installation

Hands-on installation and validation: quite easy to install

Module 7: Installing the DatAdvantage GUI

Hands-on installation of the GUI: also quite easy to install

Module 8: Adding File Servers

How to add file servers

Module 9: Using the Work Area to Determine Potential Access

Visibility of permissions, users and groups; bidirectional mapping

Module 10: The Logs View

Detailed audit data and how to use it for auditing

Module 11: Recommendations, Modeling and Committing Changes

Understanding whose access should be revoked and using the "sand-box"

Module 12: The Statistics View

Higher-level audit data: Data owners, data users, forensics

Module 13: The Alerts View

How to set up and monitor alerts

Module 14: The History View

Administrative audit trail: what changed and when

Module 15: Reporting

Configure, customize and schedule reports

Module 16: Administering DatAdvantage

Configuration, authorization, archiving and backup

Module 17: DatAdvantage Troubleshooting

Using Varonis events and SQL jobs to find and resolve problems

Module 18: Applying Your Knowledge

Hands-on entitlement review and forensics work
